1. ROX naval forces captured Yonpyon Island (125-40, 37-38) with minor resistance, and have complete control.
2. One thousand North Korean troops are digging entrenchments and erecting barracks at Parhang-ni (125-48, 37-56). About half the troops are armed with rifles; the rest are unarmed. In early September the unit obtained recruit replacements who are receiving intensive training. Sixty North Korean troops are digging trenches along the seashore of Choma-do (125-38, 37-44). The residents of these two areas are afraid that North Korean forces will confiscate their rice and, therefore, hope that UN forces will arrive before harvest time.
